

Word Space

I'm sitting calmly on my seat,
As that will help to keep it neat.
My feet are flat upon the floor,
I'm sitting straight, hold on, there's more!

Pinch your **pencil** with your thumb and pointer **finger**
Then rest it gently on your middle **finger**.

*Always start a sentence with a capital letter.
A finger space between each word will look a lot better.
Read what you have written, starting from the top
And don't forget to end it all with a full stop.*

Well I've got something good to say!
I'm gonna write it down today
I'll use my sounds to help me spell
So that my writing turns out well

Thinking of the **words** can make you **frown**
So say it out loud before you write it **down**

*Always start a sentence with a capital letter.
A finger space between each word will look a lot better.
Read what you have written, starting from the top
And don't forget to end it all with a full stop.*

A finger space between each word
Will help to stop it looking blurred.
I sit my letters on the line,
So I feel proud this work is mine!

Make your **letters** sit neatly on the **line**,
Leave a space between each word so that it looks just **fine**!

*Always start a sentence with a capital letter.
A finger space between each word will look a lot better.
Read what you have written, starting from the top
And don't forget to end it all with a full stop.*
